System Information

Proposed username: Maximum of eight (8) characters
Proposed account termination date: NOTE: User account, and all attached files, may be removed after this date
Laptop MAC address: Only required to connect to the ethernet network at Mount Stromlo Observatory. Not required for SSO/wireless connectivity. Consists of 12 hex digits separated by colons, e.g. aa:bb:cc:dd:ee:ff. Mac users: Find under System Preferences — Network. Select Ethernet from the left-hand panel, and click Advanced. The MAC address is listed under the Hardware tab. Windows users: Find under Control Panel — Network. Select Local Area Connection. Click the Details button. The MAC address is labelled 'Physical Address'. Linux users: Run the command <code>ifconfig -a</code> in a terminal window. Select the MAC address corresponding to your ethernet hardware.

By signing this document, you agree to adhere to the Information Infrastructure and Services Rules outlined by ANU. Visit <http://www.mso.anu.edu.au/local/computing/userguide/accounts.php> for more information.
